Application Form

Acknowledgement

Acknowledgement*

Thank you for your interest in applying for Opioid Settlement Funds from Boulder County.

Applicants must review the [Request for Applications \(RFA\) Guide](#) in full prior to completing their application to ensure understanding with funding requirements and limitations.

By clicking the box, you agree that you have reviewed the RFA Guide and understand that these funds are not to be used to supplant existing funds:

I agree

Pre-Qualification

Pre-Qualification

Please answer the following questions to determine whether the agency meets the minimum criteria for submitting an application.

Agency Type*

Please select the agency type.

non-governmental non-profit

Other:

If you selected "Other" for agency type, please give more details here:

Service Type*

Does the agency provide services or engage in activities related to substance misuse and behavioral health support in alignment with at least 1 of Boulder County's 4 strategic areas for funding?

1. Prevention and Education
2. Harm Reduction
3. Treatment
4. Recovery

Yes

Agency Location*

Is the agency located in Boulder County?

Yes

Service Area*

Will the agency be using Boulder County Opioid Settlement Funds to provide services primarily in Boulder County?

Yes

Alignment with Boulder County's Strategic Plan

Alignment with Strategic Plan

Boulder County has developed a strategic plan which identifies a regional vision, long-term community outcomes, short-term goals, and the individual approaches necessary to abate the harms caused by the opioid epidemic including priority populations and geographic focuses. **You can see the full Opioid Abatement plan on [Boulder County's website](#).**

The County will disperse awards based on program alignment with the strategic plan. Awards will not exceed \$150,000 per year.

Applications will identify *one focus area* and *one short-term goal*. You may select multiple approaches within the goal, if applicable.

Review the [RFA Guide](#) for complete details on Approved and Disapproved Uses, and the Glossary of Terms.

The Opioid Abatement team acknowledges that the continuum of care often includes overlap into multiple areas. Please choose the focus area and short-term goal that *most closely* aligns with the program. Applicants may submit multiple applications for the same or different focus areas and/or short-term goals, however, these should reflect different programs.

****Note: If the program/agency intends to submit multiple applications, Foundant has a ["Copy Request"](#) option to use this application as a base.**

Boulder County's Strategic Focus Areas*

Select which focus area(s) your program most closely aligns with:

Recovery

Recovery

Recovery Goal Area*

Recovery has only one goal. Please review to ensure that your program aligns.

Short-Term Goal 1: Recovery Services

- Support is available and accessible for individuals in recovery from substance use and related mental health conditions, and those in their lives, in order to improve their health and wellness, live a self-directed life, and strive to reach their full potential.

Short-Term Goal 1: Recovery Services

Strategic Approach to Recovery*

Recovery Services Goal: Support is available and accessible for individuals in recovery from substance use and related mental health conditions, and those in their lives, in order to improve their health and wellness, live a self-directed life, and strive to reach their full potential.

Boulder County has identified three strategic approaches for Recovery Services. **The program must use *at least one* of these approaches to achieve the chosen goal.**

Strategic Approach A: Recovery Services

- Increase the number and capacity of high-quality evidence-based recovery programs, including culturally responsive and linguistically appropriate recovery services.

Strategic Approach B: Recovery - Case Management and Navigation

- Increase the capacity of and access to peer support services, case management, resource navigation, and other efforts to increase connection to care for individuals in recovery from opioid use disorder and any related co-occurring substance use disorder or mental health conditions with a focus on priority populations.

Strategic Approach C: Recovery - Wraparound Services

- Increase comprehensive wrap-around services to individuals in recovery from opioid use disorder and any related co-occurring substance use disorder or mental health conditions with a focus on priority populations, including, but not limited to, housing transportation, education, job placement, job training, or childcare.

Strategic Approach A: Recovery Services

Strategic Approach B: Recovery - Case Management and Navigation

Priority Populations*

Boulder County has identified the following priority populations. Programs must serve at least one priority population outlined in the strategic plan.

Please choose which priority population(s) that your agency will focus on serving:

People Who Use Drugs (PWUD)

Youth

Program Information for Recovery Services

Program Information

In this section you will answer questions related to the **program** applying for Opioid Settlement Funds.

Project Name*

Program name

Peer-Led Recovery and Harm Reduction Initiative

Service Region*

Which Boulder County Region(s) does your program serve or intend to serve?

City of Boulder

City of Longmont

Funding Request*

What is the amount of funding being requested by the program in this application for the **full grant period?**

(i.e. A program requesting the maximum funding amount would be \$300,000, and their allocation of funds should reflect maximum \$150,000 each year.)

\$195,096.00

Program Description*

Describe the program and the anticipated benefits as it relates to the **Recovery Goal: Support is available and accessible for individuals in recovery from substance use and related mental health conditions, and those in their lives, in order to improve their health and wellness, live a self-directed life, and strive to reach their full potential.**

At minimum, please answer:

- What is the program's mission and guiding values?
- How will the program achieve the chosen goal using the associated approaches?
- Does the program or agency provide any unique or non-traditional services?
- Are there historical or current inequities that are being addressed, and how? *If applicable.*

The Peer-Led Recovery and Harm Reduction Initiative aims to support individuals in recovery from substance use and related mental health conditions by providing accessible, culturally responsive, and peer-driven services. Our mission is to empower people to improve their health, live self-directed lives, and achieve their full potential by offering harm reduction education, recovery support, and connection to resources. The program values lived experience, community engagement, and inclusivity, ensuring that services are non-judgmental and meet participants where they are in their recovery journey.

To achieve this goal, the program will:

- Train and employ peer support 20 specialists annually who bring personal recovery experience and cultural understanding. These peers will provide support, harm reduction services, and linkage to care through events and direct outreach.
- Host eight recovery-focused community events annually, offering safe, sober spaces where individuals can access resources and connect with trained peers. Events will also feature harm reduction education, including naloxone distribution.

- Distribute 160 naloxone kits annually (20 per event) to community members, increasing access to life-saving overdose prevention medication.
- Increase connections to care by partnering with local organizations that provide comprehensive wrap-around services, such as housing, mental health support, and employment assistance.

The program addresses historical inequities by targeting underserved groups, including people of color, unhoused individuals, and youth. By providing bilingual services and collaborating with community partners that serve diverse populations, we aim to reduce barriers to access and create a more inclusive recovery network. This approach helps ensure that recovery support is available to those who have been disproportionately affected by the opioid crisis.

Through peer-led strategies, culturally relevant outreach, and community-focused events, the program offers a unique, grassroots approach to fostering recovery in Boulder County.

Target Population*

Please describe the specific population served by the program. (Example: age, gender, race, socioeconomics, geographic, etc.).

At minimum, please answer:

- Which underserved population(s) will you target with your program?
- How do you define your priority populations, if any, that you will target with your program?
- How many individuals do you predict your program will be able to serve during the funding period?

The Peer-Led Recovery and Harm Reduction Initiative will primarily target underserved populations in Boulder County who are at higher risk for substance use disorders and mental health challenges. These include individuals experiencing homelessness, youth aged 18-25, people of color, and those living in economically disadvantaged communities. By focusing on these groups, we aim to reduce disparities in access to recovery services and harm reduction resources.

Our priority populations are defined as:

- People experiencing homelessness who may face additional barriers to accessing traditional treatment and recovery support due to unstable living conditions.
- Youth and young adults aged 18-25, who are particularly vulnerable to substance use initiation and are often underserved in traditional recovery programs.
- BIPOC (Black, Indigenous, and People of Color) communities, who have been historically marginalized in the healthcare system and are disproportionately affected by systemic inequities.
- Low-income individuals and families who struggle with financial barriers that limit access to treatment and recovery services.

The program will engage these populations through community events, peer support networks, and direct outreach to ensure services are accessible to those most in need. We will also work with local partners to provide wrap-around services, such as housing, mental health support, and employment assistance, to address the broader social determinants of health.

We anticipate serving approximately 800 unique individuals over the two-year funding period, with an estimated 400 individuals reached each year. This includes direct engagement at events, distribution of harm reduction supplies, and ongoing peer support connections, ensuring that a wide range of community members receive support tailored to their unique needs.

Centering Race*

What percent of the population that your program targets includes Black, Indigenous, or People of Color (BIPOC)?

40%

Outreach and Engagement*

Describe how the program reaches and serves its intended population.

At minimum, please answer:

- How will your program reach and engage with BIPOC individuals, if it isn't already doing so?
- What evidence does the program have that this is/will be an effective model for the target population(s)?

Feel free to provide specific examples.

The Peer-Led Recovery and Harm Reduction Initiative employs a culturally responsive approach to reach and serve our intended population, including BIPOC individuals and other underserved groups. Our outreach strategy is grounded in peer-led engagement, community partnerships, and the use of culturally tailored messaging to ensure our program resonates with diverse populations.

1. Reaching BIPOC Individuals:

- We actively recruit and train peer support specialists from BIPOC backgrounds, ensuring our team reflects the cultural and lived experiences of the communities we serve. These peers act as trusted messengers who can connect with participants in a culturally relevant and sensitive manner.
- We partner with local BIPOC-led organizations, such as cultural centers and community groups, to conduct outreach and co-host events in neighborhoods with a high concentration of BIPOC residents. This collaborative approach helps build trust and reduces barriers to participation.
- Events and outreach materials are designed to be culturally inclusive, with content available in multiple languages and formats that reflect the cultural context of the communities we aim to serve. We provide materials in Spanish and other languages spoken within the Boulder County community, ensuring accessibility to non-English speakers.

2. Evidence of Effectiveness:

- Our program model is peer-led and community-based, which research has shown to be highly effective in engaging underserved populations in recovery and harm reduction services. Peer support has been demonstrated to increase engagement, reduce stigma, and improve outcomes for individuals with substance use and mental health challenges.
- Since launching our events and outreach initiatives, we have seen steady participation growth among BIPOC individuals, with approximately 30% of event attendees identifying as BIPOC. The presence of BIPOC peer leaders at events has significantly increased trust and comfort levels among attendees.
- We also draw on evidence from similar peer-led harm reduction models, which have shown that providing culturally sensitive and community-based interventions leads to greater uptake of services and increased linkage to care for marginalized populations.

Overall, our approach ensures that BIPOC individuals and other underserved populations are not only reached but actively engaged in the program, with ongoing support tailored to their unique cultural and recovery needs.

Evaluation*

Describe the program evaluation process.

At a minimum, please answer:

- How is program evaluation designed and implemented?
- How do you know the program is likely to make progress and achieve its Opioid Abatement goal?
- Is your program able to collect demographic information? If not, explain.

1. Program Evaluation Design and Implementation:

- We use a Results-Based Accountability (RBA) framework, developed with the support of evaluation partners such as ResultsLab, to measure our program's impact on recovery and harm reduction. This includes tracking specific outcomes like reduced opioid use, increased connection to recovery resources, and improved mental health for participants.

- Evaluation is implemented through regular data collection at each event and through ongoing interactions with participants. We use a combination of pre- and post-surveys, focus groups, and interviews to gather insights about the program's effectiveness. Additionally, peer support specialists document interactions with participants, including linkages to care and referrals made, to track service utilization and outcomes.

- Quarterly evaluations are conducted to assess progress towards short-term goals, with findings used to adjust program activities and outreach strategies as needed. An annual evaluation focuses on longer-term impacts and informs strategic planning for future program iterations.

2. Ensuring Program Likelihood of Achieving Opioid Abatement Goals:

- The program is built on evidence-based practices for recovery and harm reduction, such as peer support, motivational interviewing, and trauma-informed care. These approaches have been proven effective in reducing substance misuse and supporting sustained recovery.

- We have a history of successful program implementation and positive outcomes from previous grant-funded initiatives, including reduced overdose rates at our events and increased engagement with recovery services.

- The evaluation framework is co-designed with community input, ensuring that our goals and strategies align with the needs of those most affected by the opioid crisis. This community-centered approach increases the likelihood of achieving meaningful progress.

3: Demographic Data Collection:

- Yes, we gather data on participants' age, gender, race/ethnicity, and socioeconomic status, as well as other relevant factors, to understand who is being served and to ensure we are reaching priority populations. This data informs our outreach efforts and helps us identify any gaps in service provision.

Overall, our evaluation process is comprehensive and adaptive, allowing us to measure impact, learn from our results, and continuously improve our efforts to address opioid-related harms in Boulder County.

Additional Program Information (Optional and Not Scored)

Please provide any additional information about the program that might add context/background for reviewers.

The Peer-Led Recovery and Harm Reduction Initiative is rooted in S.A.F.E long-standing commitment to fostering inclusive and stigma-free environments where individuals can safely explore recovery and harm reduction. Since its founding, S.A.F.E has been dedicated to addressing the unique needs of individuals affected

by substance use and mental health challenges, creating spaces where sobriety and harm reduction are celebrated as pathways to a healthier life.

The program is uniquely positioned to leverage our strong community partnerships and established presence in Boulder County to expand harm reduction and recovery services. Our approach is distinguished by our focus on peer-led interventions, recognizing that individuals with lived experience can effectively connect with participants, offer support, and serve as credible messengers in the recovery journey. This is especially important when addressing populations that may feel disconnected from traditional recovery or treatment services.

The program's cultural responsiveness is further enhanced by ongoing collaboration with local organizations to ensure that our outreach strategies and program content are culturally relevant and linguistically appropriate. S.AF.E continuously engages with a diverse range of community members and experts to inform our practices, ensuring our efforts reflect the backgrounds and experiences of those we aim to serve.

We have already made significant strides in reducing opioid overdoses at community events through the distribution of naloxone and overdose prevention education. Our efforts have not only saved lives but also shifted the narrative around recovery, helping to reduce stigma and foster greater community understanding of harm reduction practices.

Additionally, the program is part of a larger regional strategy to address the opioid crisis, aligning with Boulder County's vision to create a comprehensive continuum of care. The initiative's scalability allows us to quickly adapt to emerging needs and expand services where they are most needed, such as in rural or underserved areas.

In sum, the Peer-Led Recovery and Harm Reduction Initiative is more than just a program—it is a community movement aimed at transforming how Boulder County addresses substance use, empowering individuals in their recovery journey, and creating safer, healthier communities.

Recovery - Scope of Work

Scope of Work

In this section, you will answer questions related to the specific activities your program is doing to meet their chosen **Recovery** goal.

The questions will follow a logic model to help create a Scope of Work if your application is chosen.
If awarded funds, details in this scope of work section will be used to draft Exhibit A for the Funding Agreement.

You will also be expected to give progress reports on what you have included here.

Therefore, the more specific and accurate the information in this section of the application, the more efficient the contract finalization and program evaluation process will be for funded agencies.

Feel free to use bullet points or any of the other formatting tools available, in each section, to organize your information.

Program Activities*

An activity is a brief statement describing a specific action that will help meet the program goals; for/with what target population; and where the activity will take place.

Please choose the number of program activities you plan to include only as it relates to this funding request and the chosen **Recovery goal**.

You may choose up to 5 program activities. Please ensure that the amount of funding requested is in line with the amount of activities the program intends to complete.

Keep in mind these will be your activities for the full 2-year grant period.

4

Recovery Activity #1*

Activities: a brief statement describing a specific action that will help meet the program goals; for/with what target population; and where the activity will take place.

Example:

Host 1-hour strawberry-picking classes for low-income residents ages 65+. Classes will take place once per month at the YOLO Center.

Train 40 Peer Support Specialists annually: The program will recruit and train 40 Denver-area residents with lived experience in recovery to become certified Peer Support Specialists. This will include 20 participants in the fall cohort and 20 in the spring cohort. Training will cover harm reduction, motivational interviewing, trauma-informed care, and overdose prevention. Sessions will be held at a community center in Boulder County to ensure accessibility for participants.

Recovery Activity #1 Output(s)*

Describe the program outputs associated with the activity above. There may be 1 or multiple.

Outputs: the direct products of program activities and may include types, levels, and target of services to be delivered by the program.

Example:

Anticipated 20 unduplicated low-income senior residents participate in at least six of the 12 classes.

1. Anticipated 40 unduplicated Peer Support Specialists trained annually (20 per year).
2. Participants will complete a minimum of 40 hours of training each on harm reduction, motivational interviewing, trauma-informed care, and overdose prevention.
3. At least 80% of participants will receive certification as Peer Support Specialists by the end of the training program.

Recovery Activity #1 Timeline*

Specific details on when the activity will take place, frequency and for what length of time.

Example:

Classes will be held once per month from January 2025 to December 2025. Each class will last for one hour. Days and exact time will vary but will be posted at least 1 week in advance.

Training sessions will be conducted twice a year, with one cohort in the Fall (September–November) and one in the Spring (March–May). Each training program will last 8 weeks, with sessions held once per week for 2 hours each. Additionally, optional peer support sessions will be available throughout the training period for additional guidance and practice. Specific training dates and times will be announced at least one month in advance.

Recovery - Activity #2

Recovery Activity #2*

Activities: a brief statement describing a specific action that will help meet the program goals; for/with what target population; and where the activity will take place.

Example:

Host 1-hour strawberry-picking classes for low-income residents ages 65+. Classes will take place once per month at the YOLO Center.

Host eight sober support events annually in Boulder County for individuals in recovery from substance use and related mental health conditions. Events will include activities such as music, sports, and wellness workshops to promote community connection and provide a supportive environment.

Recovery Activity #2 Output(s)*

Describe the program outputs associated with the activity above. There may be 1 or multiple.

Outputs: the direct products of program activities and may include types, levels, and target of services to be delivered by the program.

Example:

Anticipated 20 unduplicated low-income senior residents participate in at least six of the 12 classes.

Anticipated 800 unduplicated individuals in recovery will attend at least four of the eight sober support events annually. Events will distribute 240 naloxone kits and provide overdose prevention training to attendees, enhancing harm reduction efforts.

Recovery Activity #2 Timeline*

Specific details on when the activity will take place, frequency and for what length of time.

Example:

Classes will be held once per month from January 2025 to December 2025. Each class will last for one hour. Days and exact time will vary but will be posted at least 1 week in advance.

Events will be held at least eight times annually from January 2025 to December 2026. Each event will last 3-4 hours, with dates and times announced at least two weeks in advance.

Recovery - Activity #3

Recovery Activity #3*

Activities: a brief statement describing a specific action that will help meet the program goals; for/with what target population; and where the activity will take place.

Example:

Host 1-hour strawberry-picking classes for low-income residents ages 65+. Classes will take place once per month at the YOLO Center.

Host quarterly Community Task Force meetings focused on recovery support for individuals in recovery from opioid use disorder and related mental health conditions. Meetings will take place virtually, with at least one per year at The Recovery CAFE in Longmont.

Recovery Activity #3 Output(s)*

Describe the program outputs associated with the activity above. There may be 1 or multiple.

Outputs: the direct products of program activities and may include types, levels, and target of services to be delivered by the program.

Example:

Anticipated 20 unduplicated low-income senior residents participate in at least six of the 12 classes.

Anticipated 10 unduplicated community members, including individuals in recovery and their families, will participate in at least three of the four quarterly Community Task Force meetings, contributing feedback and suggestions for enhancing recovery services and support.

Recovery Activity #3 Timeline*

Specific details on when the activity will take place, frequency and for what length of time.

Example:

Classes will be held once per month from January 2025 to December 2025. Each class will last for one hour. Days and exact time will vary but will be posted at least 1 week in advance.

Community Task Force meetings will be held quarterly from January 2025 to December 2026. Each meeting will last for two hours, with dates and times announced at least two weeks in advance.

Recovery - Activity #4

Recovery Activity #4*

Activities: a brief statement describing a specific action that will help meet the program goals; for/with what target population; and where the activity will take place.

Example:

Host 1-hour strawberry-picking classes for low-income residents ages 65+. Classes will take place once per month at the YOLO Center.

Host quarterly training sessions for peer recovery coaches to enhance their skills in motivational interviewing and trauma-informed care. Training sessions will target newly recruited and existing peer

coaches who work with individuals in recovery. The sessions will take place at the Recovery CAFE in Longmont.

Recovery Activity #4 Output(s)*

Describe the program outputs associated with the activity above. There may be 1 or multiple.

Outputs: the direct products of program activities and may include types, levels, and target of services to be delivered by the program.

Example:

Anticipated 20 unduplicated low-income senior residents participate in at least six of the 12 classes.

Anticipated 30 peer recovery coaches will complete at least 3 of the 4 quarterly training sessions in the first year they become a peer specialist, gaining enhanced skills in motivational interviewing and trauma-informed care to support individuals in recovery.

Recovery Activity #4 Timeline*

Specific details on when the activity will take place, frequency and for what length of time.

Example:

Classes will be held once per month from January 2025 to December 2025. Each class will last for one hour. Days and exact time will vary but will be posted at least 1 week in advance.

4 Yearly training sessions will be held quarterly from January 2025 to December 2026, for a total of 8 sessions. Each session will last for two hours. Dates and times will vary but will be scheduled at least two weeks in advance and shared with participants.

Recovery Budget

Budget*

Please use this **Budget Template** to provide your **projected** budget for this funding request. Your budget should be annualized to accurately reflect expenses in both 2025 and 2026.

Name the template using the following format: "25-26 [Agency name] [Program Budget] for Opioid Recovery"

You may attach the template using the "Upload" button below.

Please enter "0" in rows that do not apply.

Sober AF Entertainment_Opioid-Abatement-Application-Budget-Worksheet-Fixed.xlsx

Program Budget Narrative (Optional)

Please include any additional program budget information such as explanations for excess or shortfall of revenues and expenses and any additional information that will assist application reviewers' understanding of the program's budget.

**If the program budget runs on a fiscal year, please state that and include the fiscal year time frame.*

Principle: \$75,000 Salary with 16% Fringe = \$87,000 X 40% LOE = \$34,800 per year X 2 = \$69,600 TOTAL

Data Analyst: \$60,000 Salary with 16% Fringe = \$69,600 X 30% LOE = \$20,880 per year X 2 = \$41,760 TOTAL

Principle Investigator Advisor: \$0 Salary with 0% Fringe = \$0 X 5% LOE = \$0 per year X 2 = \$0 TOTAL

20 Tickets Per Event: 20 Tickets X \$50 per Ticket X 8 Events = \$8,000 per year X 2 = \$16,000 TOTAL

20 Naloxone Kits Per Event: 20 Naloxone Kits X \$0 per Kit X 8 Events = \$0 per year X 2 = \$0 TOTAL

Event Hosting Fees: \$1,500 per Event X 8 Events = \$12,000 per year X 2 = \$24,000 TOTAL

Peer Support Training: Darian will conduct 2 cohorts of 10 peers, about 130 hours per cohort for a total of 260 hours per year at \$50/hour. \$50/hr X 260 Hours = \$13,000 per year X 2 = \$26,000

Indirect Costs: 10% X \$88,680 = \$8,868 per year X 2 = \$17,736

TOTAL YEAR 1: \$97,548

TOTAL YEAR 2: \$97,548

FINAL TOAL: \$195,096

In Boulder County, race matters.

We center race in our equity work because we know historically and currently, race is the biggest predictor of disproportionate outcomes and disparities in the United States of America. Good government is impossible without racial equity. In 2018, the Board of County Commissioners with the full support of county and racial equity leadership, made transformational racial equity one of the county's strategic priorities.

As fully stated in Boulder County Policy 1.6:

Racial equity is one of the county's strategic priorities and the county has a moral responsibility to interrupt institutional racism that manifests through racist laws, policies, practices and behaviors.

Goals reflected in mission, vision, goals, and workplans*

Does your agency have racial equity, diversity and inclusion goals reflected in your mission, vision, goals and workplans?

Yes, S.A.F.E is committed to advancing racial equity, diversity, and inclusion in all aspects of our work. Our mission, vision, and goals reflect a dedication to providing substance use and mental health support that is accessible, culturally relevant, and inclusive for all individuals, particularly those from historically marginalized communities.

Our mission prioritizes creating safe and supportive environments for individuals in recovery, with a specific focus on reaching underserved and disproportionately affected populations, including communities of color. We recognize that individuals from BIPOC communities often face higher barriers to accessing recovery support due to systemic inequities. Thus, our vision is to break down these barriers and to promote inclusivity in every program we implement.

Our goals include actively partnering with organizations that serve racially diverse communities, recruiting BIPOC peer support specialists, and ensuring culturally relevant programming through targeted outreach and education efforts. S.AF.E's workplans consistently integrate racial equity initiatives, such as ongoing staff training on cultural competence and anti-racist practices, and implementing feedback loops with community members to continually improve our services to meet their needs.

We are dedicated to using data to identify and address disparities in our program outcomes and are committed to adjusting our strategies as needed to ensure equitable service delivery.

Policies and Procedures*

What policies and practices, if any, do you have to support racial equity, diversity and inclusion?

S.AF.E has established policies and practices that support racial equity, diversity, and inclusion (REDI) across all levels of the organization. Our commitment is reflected in the following key policies and practices:

Equity and Inclusion Policy: Our formal REDI policy outlines our commitment to fostering a diverse, equitable, and inclusive environment for staff, volunteers, and program participants. This policy ensures that we provide equal access to services and create a welcoming space for individuals of all racial, ethnic, and cultural backgrounds. It guides our recruitment processes, staff development, and service delivery, prioritizing inclusivity and cultural responsiveness.

Anti-Discrimination Policy: S.AF.E strictly prohibits discrimination based on race, ethnicity, gender, sexual orientation, or any other protected characteristic. This policy is actively enforced in our hiring practices, service provision, and interactions with partners, ensuring a safe and supportive environment for all.

Cultural Competency Training: All staff and volunteers are required to participate in ongoing cultural competency training. These trainings cover topics such as anti-racism, implicit bias, and culturally relevant service provision. By increasing awareness and understanding of systemic inequities, we aim to better serve diverse populations and address the unique needs of BIPOC individuals.

Diverse Hiring Practices: We have adopted hiring practices that aim to recruit individuals from racially and culturally diverse backgrounds, particularly for peer support roles. We actively seek to involve those with lived experience from communities of color, ensuring that our staff reflects the populations we serve.

Community Feedback Loops: We have established mechanisms for gathering feedback from racially diverse communities to ensure our programming is culturally appropriate and addresses the specific needs of BIPOC populations. This practice allows us to adapt our services based on direct input from those we aim to support.

Partnerships with REDI-focused Organizations: We collaborate with organizations dedicated to racial equity to share best practices and enhance our approaches. This includes joint training sessions, community events, and program development initiatives aimed at increasing our outreach to underserved populations.

Documentation

If you would like to attach more than one document, you will need to combine it into *one document* before attaching.

Service Delivery*

How does the program consider race (center race) in its service delivery?

S.AF.E centers race in its service delivery by actively addressing racial disparities in access to recovery and harm reduction services and tailoring our approaches to meet the unique needs of BIPOC communities. Our strategies include:

Culturally Responsive Programming: We design our programs to be culturally relevant and responsive to the needs of diverse racial and ethnic groups. This includes incorporating culturally specific practices, traditions, and healing approaches that resonate with BIPOC communities. We offer recovery support and harm reduction services that honor cultural values and experiences, making our services more accessible and effective for those who may feel disconnected from mainstream approaches.

Targeted Outreach and Recruitment: We focus our outreach efforts on racially diverse communities that have historically experienced higher barriers to accessing recovery support. By partnering with local community organizations that serve BIPOC populations, we increase awareness and accessibility of our programs. Our peer support specialist recruitment also prioritizes individuals from diverse racial backgrounds, ensuring that participants see themselves represented in those providing services.

Language Accessibility and Inclusivity: S.AF.E ensures that language is not a barrier to accessing our services by offering multilingual resources and translation services for our events and training sessions. We provide program materials in languages spoken by the communities we serve, with a specific focus on Spanish-language support in Boulder County. This practice increases participation and understanding of our services among non-English speaking individuals.

Community Feedback and Co-Design: We engage BIPOC communities in the development and evaluation of our programs through community task force meetings and feedback loops. This participatory approach allows us to continuously improve our service delivery by incorporating the perspectives and lived experiences of the people we aim to serve, ensuring our programs are meeting their specific needs.

Focus on Reducing Racial Disparities: Our service delivery prioritizes reducing racial disparities in recovery and harm reduction outcomes. We track demographic data to identify gaps in service access and outcomes for BIPOC participants and adjust our programming accordingly. This ongoing evaluation helps us target resources and support to where they are most needed.

Outreach*

How does the program/agency consider (center race) in its outreach efforts?

How will the program meaningfully engage clients or participants in the design, implementation, and evaluation of the program?

S.AF.E centers race in its outreach efforts by prioritizing culturally relevant strategies to reach BIPOC communities and ensure meaningful engagement in all stages of program development and evaluation. Here's how we achieve this:

Community-Driven Outreach: We collaborate with local organizations and leaders from BIPOC communities who have established trust and connections within these populations. By partnering with culturally specific service providers, religious organizations, and grassroots groups, we can leverage existing networks to extend our reach. This community-driven approach helps us connect with people who may not traditionally access mainstream recovery or harm reduction services.

Recruiting Culturally Diverse Peers and Volunteers: Our outreach strategy includes actively recruiting peer support specialists and volunteers from BIPOC backgrounds. This not only helps create a staff and volunteer team that reflects the communities we serve but also enhances our outreach efforts by involving individuals who understand the cultural contexts of our target populations.

Engagement in Program Design and Evaluation: S.AF.E ensures that BIPOC participants are involved in the co-design of our programs. We regularly host community feedback sessions and task force meetings where participants can share their perspectives on program needs, service delivery approaches, and potential improvements. By actively listening to and incorporating feedback from these sessions, we ensure that our programs are shaped by the voices of the people they aim to serve.

Leadership Opportunities for Participants: We provide leadership roles for BIPOC participants within the program, such as serving on advisory boards or leading outreach efforts. This empowers individuals from underserved communities to take ownership of the program and contribute to its evolution. Engaging participants in meaningful roles enhances their connection to the program and ensures it remains responsive to their needs.

Continuous Feedback and Iteration: We employ a continuous feedback loop that allows clients and participants to share their experiences and suggest improvements throughout the program's lifecycle. This includes post-event surveys, focus groups, and anonymous feedback channels. By centering the lived experiences of BIPOC individuals, we adapt our outreach efforts to be more effective and inclusive.

Racially Diverse Perspectives*

How does the program/agency actively draw upon racially diverse perspectives in the community during the planning process?

S.AF.E actively incorporates racially diverse perspectives during the planning process to ensure that our programs are relevant, culturally appropriate, and responsive to the needs of the communities we serve. We use a community-driven approach to integrate the voices of BIPOC individuals in every stage:

Community Advisory Boards: We engage a diverse group of community members, including BIPOC individuals, to serve on advisory boards that guide the planning and implementation of our programs. These boards provide crucial input on cultural nuances, potential barriers, and community-specific needs, helping us shape our initiatives in ways that are directly informed by the lived experiences of those we aim to serve.

Partnerships with BIPOC-Led Organizations: We collaborate with local BIPOC-led organizations that have deep roots in the community. These partnerships allow us to draw upon their expertise and understanding of cultural dynamics to inform our program strategies. For example, we work closely with these organizations during the planning process to ensure that outreach efforts, service delivery, and resource distribution align with the cultural values and practices of the target populations.

Focus Groups and Community Feedback Sessions: We hold regular focus groups and community feedback sessions with BIPOC individuals to gather insights on specific needs, preferences, and cultural considerations. These sessions are facilitated by individuals who share the cultural background of participants to encourage open dialogue and honest feedback. The information gathered is directly integrated into program planning to address any identified gaps and tailor services to community expectations.

Use of Data to Address Disparities: We analyze demographic data to identify racial disparities in substance use, mental health challenges, and access to services within the community. This data helps inform program planning by highlighting specific groups that may require targeted interventions or culturally adapted services. By addressing these disparities, we ensure that our planning process is data-informed and equity-focused.

Leadership Development Opportunities: We offer leadership development opportunities for BIPOC participants who have engaged with our programs. By involving them in the planning process, we not only draw on their diverse perspectives but also empower them to influence program direction and advocate for the needs of their communities.

Steps in 2025*

What steps do you plan to take in 2025 to strengthen your agency's/program's racial equity, diversity, and inclusion?

In 2025, S.AF.E plans to take several strategic steps to strengthen our agency's commitment to racial equity, diversity, and inclusion (REDI). Our goal is to enhance the cultural responsiveness of our programs, ensure equitable access to services, and deepen our engagement with BIPOC communities. Here are the key steps we will take:

Increase BIPOC Leadership Representation

To reflect the communities we serve, S.AF.E will prioritize hiring BIPOC staff and promoting BIPOC leaders into key decision-making roles within the organization. We will actively recruit diverse candidates for staff positions, the board, and advisory committees. This will help bring varied perspectives to program planning and organizational governance.

Establish Community-Based Partnerships with BIPOC Organizations

We will deepen our collaboration with BIPOC-led organizations and culturally specific service providers. By co-hosting events, sharing resources, and developing joint initiatives, we aim to expand our reach and improve service delivery to underserved communities. This will include integrating these partners into our advisory roles for planning and program evaluation.

Create Culturally Adapted Program Offerings

Based on feedback from community focus groups, we will develop culturally adapted recovery and mental health programs. These may include incorporating traditional healing practices, offering multilingual services, and creating culturally relevant educational materials. Our programming will be flexible to accommodate the unique needs of various cultural groups, ensuring greater relevance and accessibility.

Strengthen Data Collection and Evaluation Practices for Equity

We will improve our data collection processes to capture more detailed demographic information about program participants, including race, ethnicity, and language preferences. This data will be used to evaluate program outcomes and address disparities in access and engagement. We will share findings with the community and use them to inform adjustments to our programs to better serve BIPOC communities.

Launch a Community Ambassador Program

We will establish a Community Ambassador Program that recruits and trains individuals from BIPOC communities to serve as liaisons between S.AF.E and their communities. These ambassadors will help guide outreach strategies, promote programs, and provide feedback on how we can better meet the needs of diverse populations.

Partnerships or Training*

If available, provide details on any current racial equity, diversity, and inclusions partnerships or training that you are engaged in.

S.AF.E is actively engaged in several partnerships and training initiatives aimed at advancing racial equity, diversity, and inclusion (REDI). Our ongoing efforts include collaborating with organizations that specialize in REDI work and participating in continuous training to build our capacity in these areas. Here are some key details about our current partnerships and training initiatives:

Partnership with ResultsLab for REDI Training and Capacity Building

We have partnered with ResultsLab to engage in targeted racial equity training, focusing on data collection, analysis, and program evaluation practices that center on equity. This partnership has helped S.AF.E improve how we track participant outcomes and assess the effectiveness of our programs across different racial and

cultural groups. ResultsLab has provided us with ongoing support to strengthen our equity-focused data framework, ensuring that our efforts to address disparities are data-driven and impactful.

Collaboration with BIPOC-Led Organizations for Program Development

S.AF.E works closely with several BIPOC-led organizations, including Black Health Initiatives and Latinx Wellness Collaborative, to co-create culturally responsive programming and provide feedback on our services. These partnerships ensure that our events and recovery support programs are informed by the lived experiences of BIPOC communities and reflect culturally appropriate approaches to substance misuse prevention and recovery.

Active Involvement in Community REDI Initiatives

We participate in regional racial equity initiatives, such as the Boulder County REDI Collaborative, where local service providers come together to share best practices and collaborate on community-wide strategies for advancing racial equity. Our participation in this collaborative ensures that we stay informed about the latest developments in equity work and integrate community-informed practices into our programming.

Through these partnerships and training efforts, S.AF.E is committed to fostering a more inclusive and equitable organization that meets the diverse needs of the communities we serve. Our engagement in ongoing REDI initiatives is an integral part of our mission to provide recovery support that is accessible, culturally relevant, and effective for all individuals.

Thank you for applying for Opioid Settlement Funds.

You will receive a confirmation email from Foundant once your application has been submitted.

If your program or agency intends to work towards multiple goals it must submit an application for *each short-term goal*.

For your convenience, Foundant has a "Copy Request" option which will allow you to use this application as a base.

County Staff will reach out if there are questions about your application. Notification of awards will occur via email in November 2024.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.
